

LEED Credit

BigBelly can help your green building project in two ways:

- ▶ BigBelly can help you get LEED building design credits toward silver, gold and platinum awards
- ▶ BigBelly can be used to showcase your entire green building effort

Developed by the US Green Building Council, LEED (Leadership in Energy and Environmental Design) is a rating system that awards points for various “green” elements. See www.usgbc.org

Maximum points available = 69

Certified 26–32,
Silver 33–38,
Gold 39–51,
Platinum 52–69

Incorporating BigBelly into a project can earn you 1 point as an innovation credit. One point is meaningful and can be the difference between Silver and Gold (for example).

BigBelly® Gets You Points and P.R.

BigBelly can get you credit in two phases of your green building project:

- ▶ During the construction phase BigBelly can be part of an overall program to reduce, reuse, recycle and minimize waste
- ▶ Deployed for public use once the project is complete, BigBelly can be part of your comprehensive recycling and waste management program.

MADE IN USA—PATENTS PENDING
CE AND RoHS COMPLIANT

LEED Sites with BigBelly include:

- ▶ City of Vancouver Olympic Village
- ▶ Duquesne University in Pittsburgh
- ▶ Dockside Green in B.C. Canada
- ▶ Cape Cod Community College
